

1-4-All

E.C. Fertiliser

A solution of micro-elements containing; copper (Cu) 0.5%, iron (Fe) 1.5%, manganese (Mn) 1.5% and zinc (Zn) 2%, w/w. It also contains low levels of nitrogen (N) 2% and magnesium (Mg) 0.5%, w/w.

Foliar fertiliser

1-4-All is a liquid foliar fertiliser designed for use on all crops. 1-4-All gives a balanced range of micro-elements to ensure optimised plant growth, as and when demanded by the metabolic processes of the plant.

1-4-All can be used either as a standalone product to resolve micro-nutrient deficiencies, or as part of a fertiliser programme to support optimal growth of plants.

1-4-All has the additional benefit of reducing the effects of day to day (circadian) plant stresses, allowing more even growth throughout the day.

To be used only where there is a recognised need. Do not exceed the appropriate dose rates.

Recommendations

For use in all crops including cereals, oil seed rape, potatoes, sugar beet, all vegetables, top fruit and protected crops and berries.

For specific details on crops / rates / timings please contact Bionature or visit www.bionatureagriculture.com

Rates of application:

Use between 2 to 5 litres per hectare in a minimum of 200 litres of water per hectare. Spray the crop to the point of run-off and increase water volumes as appropriate if plant foliage is dense to ensure adequate coverage.

For maintenance of a healthy crop use 2 litres per hectare 3 times during the growing season. For control of minor trace element deficiencies and to combat plant stress use 2-3 litres per hectare, applied every two weeks. For control of major micro nutrient deficiency and where plant stress is high, use up to 5 litres per hectare as necessary.

Directions for use

Fill the spray tank with half the required volume of water and begin agitation. Add the required amount of 1-4-ALL slowly to the tank, maintaining agitation. Add the remaining water. Clean thoroughly after use.

Compatibility:

1-4-ALL is physically and chemically compatible with most pesticides and foliar fertilizers. Always conduct a 'jar test' before use to ensure physical compatibility or consult Bionature for the latest information.

Storage:

Store securely at ambient temperatures. Avoid freezing. Protect from frost. Keep out of direct sunlight.

Danger

May cause an allergic skin reaction.

Causes serious eye damage. Toxic to aquatic life with long lasting effects.

Precautionary statements

Avoid breathing vapour/spray.

Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.

IF ON SKIN: Wash with plenty of water.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Dispose of contents/container in accordance with national regulations.
