

Risk Assessment & Audit

Mexico 2026

Risks when travelling – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Travellers stomach problems	L	M	Ensure only bottle water is drunk. Do not clean teeth in tap water.		
Mosquito bites leading to malaria, dengue fever or Zika virus	L	M	All participants to be instructed to cover up in the early morning and late afternoons, sleep under mosquito nets in areas where the insect populations are high and wear insect repellent. If taking anti-malarial tablets then participants advised to complete full course. All participants to be warned of specifics of each disease and symptoms to look out for.		
Theft, mugging, violence & personal security	M	L	Participants will stay in a hotel whilst in the city and will be briefed on how to reduce the risks. Valuables should remain “off display” at all times, and participants should not walk out alone at night and avoid remote areas of the city. Participants will be briefed on ensuring they lock their room doors overnight and when they leave the room.		
Dehydration	M	M	All participants are informed that dehydration is a significant risk at all times when in the expedition country. They should be informed that they should drink 3 litres of water per day. For any treks, participants should carry sufficient water supplies for the duration of the trek and the trek leader should stop regularly to rest and check for signs of dehydration. Participants on the marine site should be encouraged to drink water and hydration salts throughout the day, and to take bottles on to boats.		
Being injured from traffic	L	M	All participants told of dangers of the busy city roads. Everyone should walk on sidewalk rather than road.		

Transfers & vehicles: Cars, buses, trucks – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Lack of management control increases risks of collision or other incident	L	M	Ensure there is an English-speaking transfer supervisor for each journey or when not possible that the leader of the group has been briefed as to journey details and provided with a bilingual contact able to communicate with the driver that they are able to call in case of any issues.		
Vehicles attacked	L	H	Travel to take place during daylight and on main roads wherever possible.		
Passengers becoming sunburned or rained on during the journey	M	M	All participants sitting outside in the back of the trucks or on boats to be told to use sunblock. When raining all passengers to be given tarpaulin covers. When changing from large bus to smaller buses at marine site, complete the changeover at the gas station so there is cover and shade.		
Participants unprepared for length of journey or relevant risks	L	M	Ensure transfer briefing is given before any transfer. This should include as a minimum: The length of the journey, the approximate times of any breaks, what to expect during breaks in terms of relevant risks and where is “off limits” (e.g. crossing the highway to browse other shops).		
Inappropriate or lack of insurance	L	L	Ensure supplier holds relevant motor insurance to satisfy national requirements. This is a contract requirement.		
Inexperienced driver increasing risk of accident	L	H	Ensure driver has more than 3 years’ relevant experience.		
Driver fatigue	L	M	Ensure there is a second driver if the journey is longer than 10 hours on any given day.		
Driver unaware of safety requirements	L	M	Ensure the driver has committed to meet their obligation to comply with national vehicle regulations relevant to the journey e.g. for licensing, speed limits, weight of vehicle, number of passengers etc. and have been briefed on our safety requirements (see below). This is a contract requirement.		

Tyres not able to support emergency braking	L	H	Ensure that each tyre has visible tread in the central part of the tyre all the way round, and that there are no clear irregularities such as bulges.		
Lack of comfort on journey	L	L	Ensure that all passengers have a seat (not including floor space) if the journey is longer than 1 hour.		
Lack of comfort on journey	L	L	Ensure that luggage is stored in a separate area of the vehicle or does not prevent passengers from being in a comfortable sitting position on journeys longer than 1 hour.		
Participants becoming lost during travel	L	H	If using multiple vehicles, ensure that they travel in convoy or there is one transfer supervisor (who has a mobile phone and can contact each of the drivers) per group of vehicles.		
Driver not following safety requirements	L	H	Ensure that the driver drives carefully and within the speed limit, does not use their phone whilst driving, and stops at least once every 4 hours in order to prevent fatigue.		
Other risks associated with travel by pick up trucks	L	M	If participants are travelling in the bed of a pick up truck, ensure that they are all able to sit in the bed on not on the edge. Ensure that all participants are told not to sit on the edge, and not to stand during transit. Ensure that the tailgate locks securely, and that participants know not to touch it during transit. Ensure that pick up trucks carrying passengers never exceed 50kmp/h.		

Transfers and vehicles: boats – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Lack of management control increases risks of incidents	L	M	All journeys to be accompanied by a transfer manager who should make sure that the vessel is not overloaded, and that all participants are fully briefed on where they can travel or sit within the boat, location of lifejackets and toilets (if any), and expected journey time.		

Vessel sinking or capsizing	L	H	All boats used for transportation to be registered with the relevant port authorities. Captain to have method for communication with rescue services. Lifejackets to be available for all participants (except on dive or snorkel trips). Passenger boats to have radio communications or mobile phone communications with the shore. Boats to adhere to coastguard regulations and not go out if weather is bad.		
Passengers suffering sunburn, dehydration or heat-stroke	M	M	Boat leader to make sure that sufficient drinking water is available, and that participants are told to wear sun block if outside.		
Passengers suffering sea sickness	M	L	Participants to be advised to bring travel sickness medication and reminded to take it, if desired, prior to the journey.		
Falling whilst boarding	L	L	Participants to be advised to board one person at a time. If using a gangplank ensure that there is an option for participants to board without their luggage and it be passed to them once they are onboard.		

Water Margins – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Inappropriate supervision	L	M	Complete assessment pro-forma to establish level of supervision required		
River crossings	L	M	Do not enter water where the current/flow could cause the participant to be moved to a deeper or more dangerous area of the water. Staff member to enter first in order to test the depth and terrain under the water. Any slippery sections should be highlighted. Use a rope if appropriate over sustained slippery terrain.		

Bathing in streams	L	M	Give a safety briefing to ensure that any out-of-bounds areas are highlighted, any non-bathing activities are prohibited, means of access to the bathing area is specified (e.g. no diving in to the water), and participants are told not to be alone in the water unless in a pre-defined bathing area.		
Beach/lakeside activities (including leisure time on the beach)	L	M	Ensure appropriate supervision is in place (see pro-forma). Do not enter water if there are strong tides or current that could cause participants to be drawn out to sea or to a dangerous area (e.g. rocks or coral). Give a safety briefing to highlight any out-of-bounds areas. Participants must go in pairs and inform staff when and where they are going.		
Swimming pools	L	M	Ensure participants are told never to use the pool alone. Brief participants on any slippery areas around the pool and on any banned activities e.g. diving in the shallow end. No use of the swimming pool after sunset or before sunrise.		
Alcohol	L	H	No alcohol to consumed by any participants whilst in the water. No participants to enter the water whilst under the influence of alcohol.		

Terrestrial risks – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Participant becoming lost	L	H	All groups must sign out when leaving the camp using whiteboard system and if the group does not return on time then contact will be attempted with the group and if this is not possible a search and rescue team will be		

			organised. No participant to leave the camp site area unaccompanied.		
Safety and security of participants and personal belongings	L	H	Valuables should not be left lying around. Guards or Opwall staff members will always be present in the terrestrial camps.		
Participants poorly equipped or with a lack of fitness to cope adequately with the forest conditions	L	M	Participants are fully briefed prior to the start of any walks and check they have the appropriate equipment with them. New participants will be watched carefully for signs of exhaustion and to adjust the distances covered according to the fitness levels. Training sessions given to students prior to expedition to ensure they are fully prepared for conditions on site.		
Lack of hygiene increasing risk of disease	L	M	Hands should be washed regularly before eating using hand washing facilities provided on site. Kitchen facilities whilst on site should be kept clean and food categories (eg meats, vegetables etc.) are prepared separately. All tables on site are cleaned with bleach at least once a day and dishwashing bucket water changed frequently.		
Allergic reaction to food	L	H	All participants to submit dietary and allergy information prior to the expedition. Where allergies are serious (eg severe nut allergies), no trigger foods to be prepared or served whilst the relevant participant is on-site (eg a total nut ban).		
Medical problem for participant	M	M	All medical details are provided by all participants before the expedition and reviewed by country manager and expedition medics. Medical staff always available during the expedition or always within close proximity of medical facilities. Sites have adequate medical supplies for stabilising any patients needing to be transferred to a hospital.		
Need for emergency evacuation	L	H	Vehicles always available for emergency evacuation from field sites. Full evacuation plans in place for extraction to local medical facilities.		
Falling down steep slopes, hole or tripping on slippery surfaces	H	H	All participants must stick to designated paths in the forest along which any potential hazards are roped off.		

			Participants advised to keep a close eye on their footing in and outside camp. Regular trails with steep slopes to be fitted with ropes. Ropes to be installed around river showers and washing areas where needed.		
Snake bite	L	H	Only herpetologists will capture snakes and species should not be brought to camp to show participants. All participants should wear long baggy trousers and walking boots/wellingtons when walking through the forested areas. If snake bite was to occur then response is to apply a light pressure bandage, immobilise the patient and evacuate them to hospital.		
Large cat attack	L	H	All participants to travel in groups in the forest. Chance of this type of incident is extremely low.		
Small mammal or bat bite	L	H	Only participants who have received rabies injections to be allowed to handle bats and small mammals. Any participant or staff member bitten by a bat to be given booster rabies injections.		
Reaction or disease from insect or arachnid bite	M	M	Participants with strong reactions to insect/arachnid bites identified prior to expeditions, and instructed to carry epipens with them. Participants to wear long trousers and closed-toed footwear whilst in forested areas and long grass.		
Local fauna and flora	M	M	Trek leaders to walk at front of group and identify any major insect hives and ensure groups avoid these areas. All participants should check their shoes before putting them on. Participants will be briefed on any risks from flora or fauna.		
Heavy rain causes river to rise, landslides or tree fall	L	H	Experienced expedition site manager to select the site to minimise risk from flooding, landslides and tree fall. In exceptionally heavy rain organise a 24 hour look out system for logistics staff and partners.		

Fire	L	H	Smoking is not permitted anywhere inside the forest except in designated areas. All participants should be fully briefed on this regulation and are trained in evacuation procedures. No smoking allowed in any tent, hammock, building or local houses.		
------	---	---	--	--	--

Marine risks – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Need for emergency evacuation	L	H	Vehicles always available for emergency evacuation from field sites. Full evacuation plans in place for extraction to local medical facilities.		
Injury or danger encountered when wandering around the town	L	M	Camp manager must be informed of any groups leaving site and they are due to return. All trips off site should be in groups of at least two people.		
Fire	L	H	No smoking allowed within buildings and only in designated smoking areas. All participants should be fully briefed on evacuation procedures.		
Lack of hygiene increasing risk of disease	L	M	Participants sleep in dorm rooms with flushing toilets and showers and will be briefed on the importance of washing hands thoroughly before meal times. Hand sanitizer on buffet table.		
Insufficient communication facilities	L	H	Emergency phone charged and kept with a copy of emergency numbers.		
Safety and security of participants and personal belongings	L	H	Valuables should not be left lying around. Local staff members will always be in and around the on-site accommodation. If accommodation has lockable rooms then this should be done at night and whilst rooms are unoccupied.		

Diving & Snorkelling – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Injury caused by falling tank	L	M	All tanks should be laid down when they are not being directly supervised.		
Inappropriate pre dive check	L	M	Buddy dive equipment checks to be done for all divers prior to entering the water and these to be checked by supervising dive staff		
Becoming separated whilst diving	L	M	All divers receive a full briefing about the times, dive profile, possible currents and what to do in the event of becoming separated. Opwall and Akumal dive leaders to carry SMB at all times.		
Lack of supervision during dive training	L	M	All dive trainers in the water at a ratio of 1 Dive Instructor and 1 Dive Master per 8 students. Dive instructor or dive master to remain close to group and monitor group at all times.		
Lack of supervision during dives	L	M	All qualified divers in the water with a Divemaster per 6 students. Dive instructor or dive master to remain close to group and monitor group at all times.		
Lack of cover for divers	L	M	For boat dives: boat to maintain visual contact with dive groups on the surface and to have sufficient oxygen, trained personnel in oxygen delivery and a First Aid kit. All dive professionals to be briefed to make every effort to surface as near to the boat as safely possible. Shore dives to always have a sign out system where an alarm is raised if the group are not back on time.		
Are all divers checked to ensure they have not exceeded 18m depth, maximum dive time of 50 minutes, stopped at 5m for 3 minutes and have 50	L	H	The boat roster is completed pre-dive with starting air and post-dive with final air, time, safety stop check and max depth for all dives.		

bar/700psi remaining in the tanks at the end of the dive?					
Lack of understanding signals	L	M	Some dive professionals will use different signals, so it is important that a standard is kept for all. Briefings given prior to dive.		
Injury or Illness during snorkelling	L	M	All snorkelers to be wearing a wetsuit or rash vest and short to protect from the sun. All participants briefed on dangers of local flora and fauna.		
Injury during snorkelling from boats	L	M	Clear briefings on designated snorkelling areas and need to stop and check for boats every few minutes.		
Becoming lost while Snorkelling	L	M	All snorkelers must sign in and out and be covered by a staff member (see below)		
Lack of supervision for snorkelling groups	L	M	Depending on the location this may be shore cover / boat cover / in-water supervision. All snorkelers must be in groups of two or more and the group or supervisor (who should have an appropriate water rescue qualification) must carry an SMB. For night-snorkels, each pair to have a torch, and supervision must be provided both in water and on shore with a maximum ratio of 1:6.		

Hurricane and severe weather risk – Completed by..... Date.....

Risk	Likelihood	Severity	Mitigation measures	Observation or Interview	Compliance (Action to be taken if not compliant)
Hurricane or severe weather	M	M	Weather monitored by reserve management and dive centre and any severe weather is reported to Opwall staff. If weather is severe but camp safety is not compromised then activities to be restricted until it has passed. If impending weather conditions to be sufficiently serious to warrant an evacuation of personnel from the survey sites, then instructions to be given to remove all staff and volunteers to the nearest government assigned evacuation point (Xpujil for forest sites and Playa del Carmen for the marine sites). Ensure		

			senior staff on site regularly communicate with reserve or dive centre regarding weather issues.		
--	--	--	--	--	--

Harassment, Bullying and Sexual Violence – Completed by..... Date.....

Risk	Likelihood	Severity	Who might be affected	Existing/additional controls	Assessment Method	Compliance (Action to be taken if not compliant)
Sexual harassment or assault by staff towards a participant, exploiting position of trust/seniority	L	H	Participants, particularly under-18s and those travelling alone	Staff recruitment includes safeguarding/background checks; all staff sign Code of Conduct and complete safeguarding training; 1:1 unsupervised contact with under-18s prohibited; site manager acts as Safeguarding Lead on every site; induction briefing for all participants covering reporting routes; alternative reporting route available if the concern involves the site manager themselves (see note below)		
Sexual harassment or assault between participants (peer-on-peer)	L	H	All participants, particularly under-18s	Code of Conduct signed by all participants; separate sleeping/washing facilities by sex and age group where practicable; staff supervision ratios maintained; induction briefing; clear, accessible reporting routes		
Bullying or exclusion within participant groups (including school groups and online/group chats)	L	M	Participants, particularly school students	Group leaders/teachers briefed on reporting routes; staff monitor group dynamics; site manager (Safeguarding Lead) available; anti-bullying expectations set at induction		
Harassment or inappropriate behaviour from members of the local community or other site visitors towards participants	L	M	Participants, particularly female participants and under-18s	Local staff/fixers briefed on expected standards; site access controls; staff accompany participants off-site where risk identified; local cultural guidance given at induction		
Barriers to reporting due to remote location (limited connectivity, no immediate access to	L	M	All participants, particularly under-18s and	Multiple reporting routes identified at induction (on-site and off-site); satellite/emergency communication maintained at all sites; established local authority and embassy/consular		

police/embassy, isolation from usual support network)			those travelling alone	contacts held by site management; incident escalation and evacuation procedure in place		
Alcohol or drug use increasing vulnerability to, or likelihood of, harassment/assault	L	M	All participants	Alcohol/drug policy enforced per Code of Conduct; site-specific alcohol restrictions; staff monitoring at social settings		
Under-reporting by under-18s due to age, unfamiliarity with staff, or reluctance to approach an adult	L	M	Under-18 participants, especially those travelling without a teacher/parent	Age-appropriate safeguarding briefing at induction; multiple named contacts offered (site manager, any other senior staff, teacher for school groups); reassurance that reporting will not lead to negative consequences for the reporter		
Retaliation or ostracism of a participant/staff member after reporting a concern	L	M	Reporting individual	Non-retaliation stated explicitly in Code of Conduct; confidential handling of reports; site manager (Safeguarding Lead) monitors welfare of reporter post-disclosure		
Concern relates to the site manager themselves, or the participant does not feel comfortable raising it with them	L	M	All participants, particularly under-18s	Off-site/head-office escalation route (e.g. UK-based safeguarding contact, out-of-country senior management) communicated at induction alongside the on-site route, so no single person is the only option
