

Solar LED Street Light

Our **PD-PL-008** is a very popular type of fitting especially for commercial applications. It can be installed in and around car parks, at entrances to commercial buildings, along footpaths and in outdoor shopping centres. It is very easy to install, incredibly efficient and the LED light output is great in providing low level amenity lighting without causing light pollution. These lights come with an automatic switching function (auto power on/off) and a wireless controller to configure smart dimming schedules, running status and power control. **The PD-PL-008 is an IDA Dark Sky Approved product.**

This Dark Sky Approved fitting is available in 2700K or 3000K, or our unique amber wildlife friendly version is available at 2200K.

3000K or warmer must be selected to meet IDA certification compliance

- > Dark Skies Approved product
- > Bright 2600 Lumen output
- > Easy install onto existing column
- > No running costs
- > 45 Watt Monocrystalline Solar Panel
- > Built in Dusk until Dawn sensor
