SALON MANAGER

01 Access Client Record Card

Hello everyone, today I'm going to show you how to view a client's record card from their appointment in Salon Manager. First, we need to go to the client's appointment whose record card we wish to view and double click on it. That will bring up a menu. On the right hand side of this menu is a button, View Client Record Card. Once we click that, it will load the client's record card.
