SALON MANAGER

01 Print Team Member Appointments

Hello, today I'm going to show you how to print a team member's appointments to the receipt printer in Salon Manager. First, we need to go to the team members column and hover over their name at the top. Once we've done this, we can click the three dots at the bottom right. This will bring up another menu. From here, we can go to print bookings for at the top right and click to print that. That will print their day bookings off to the receipt printer.
