

Assign Colours To Arrived Clients

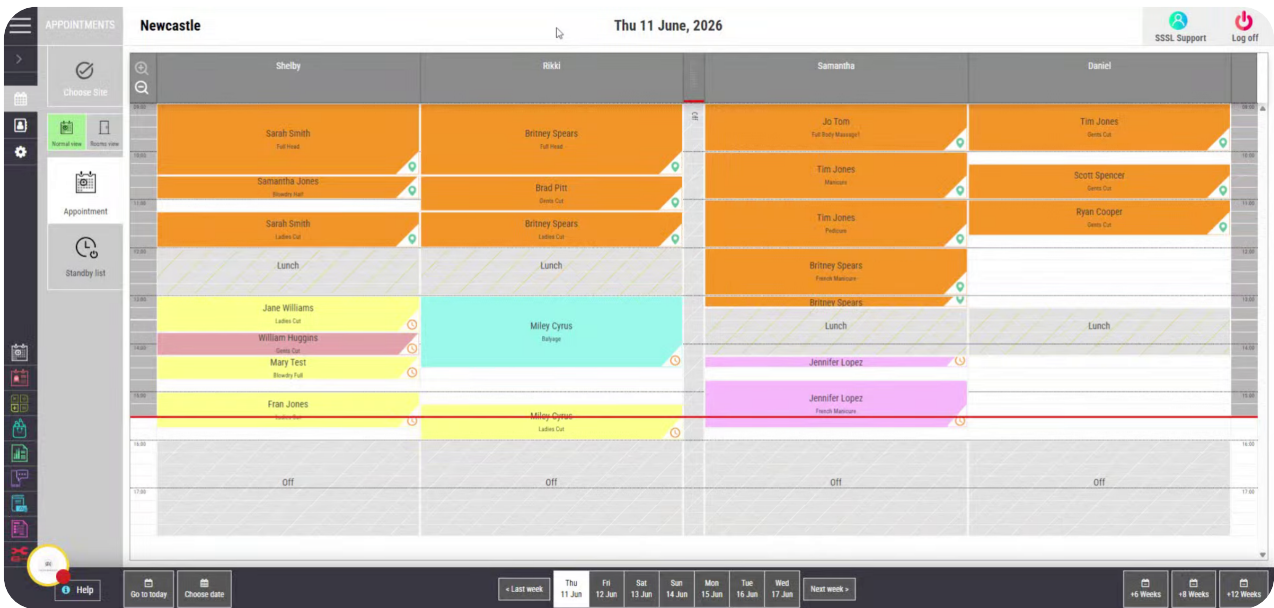

Powered by [guidde](#)

SALON MANAGER

01 Access Display Settings

Hello, today I'm going to show you how to assign a colour to your arrived clients in Salon Manager. As you can see, I've got a few arrived clients here that all have this orange colour. To change this, go to the settings cog on the left-hand side and click. This will load us into a new page. Go to display settings down here at the bottom left of this menu.

02 Enable And Save Colour Settings

In here you will see an option to turn on arrived booking colour, next to it is box where you can select a colour. Once these are set, click save, and that will update any arrived clients colours in the diary.

The screenshot shows the 'Appointment Display Settings' page in a software application. The page has a dark sidebar on the left with icons for 'Opening Hours', 'Appointment Books', 'Rooms', 'Classes', and 'Display Settings'. The main content area is titled 'Appointment Display Settings' and contains the following elements:

- Choose how you would like to view your appointments:** Two options are shown: 'Legacy Mode' (with a calendar icon) and 'Modern Mode' (with a calendar icon and a green checkmark). Below each icon is a brief description: Legacy Mode keeps the web-based diary close to the original Salon experience, while Modern Mode offers a new and improved experience optimized for ease of use.
- Hide booked out team member columns:** A toggle switch that is currently turned off.
- Arrived booking colour:** A toggle switch that is turned on, followed by a color selection box showing an orange color.

At the bottom of the page, there are 'Back' and 'Save' buttons.
