SALON MANAGER

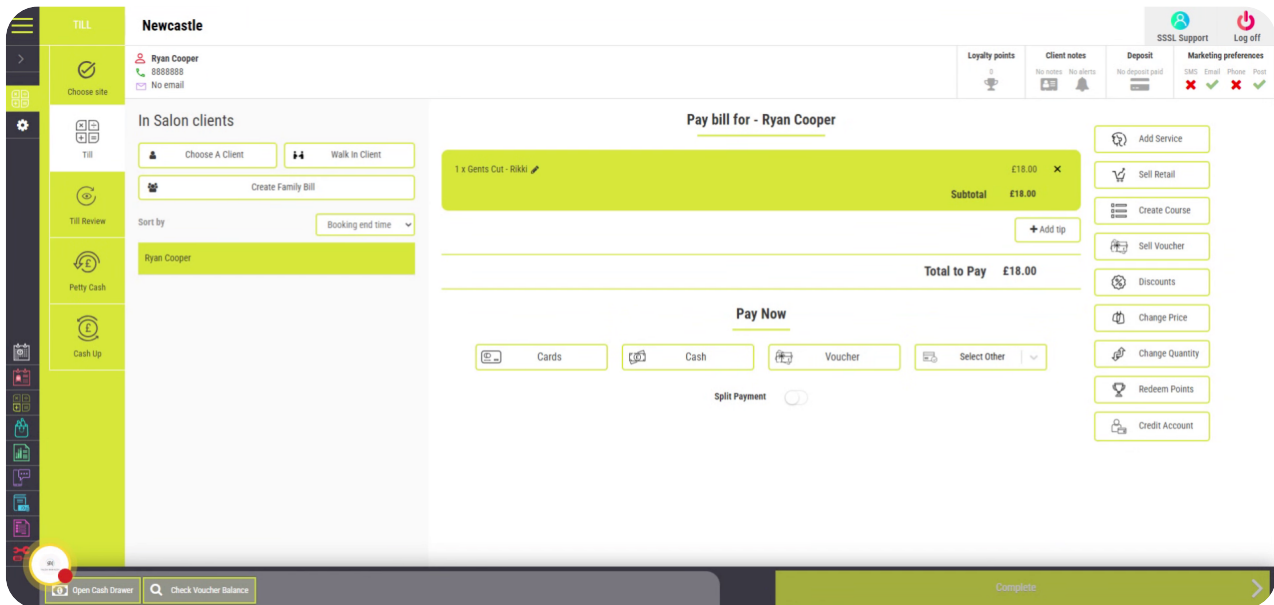

01 Introduction To Retail Addition

Hello, today I'm going to show you how to add a retail product to a bill in Salon Manager.

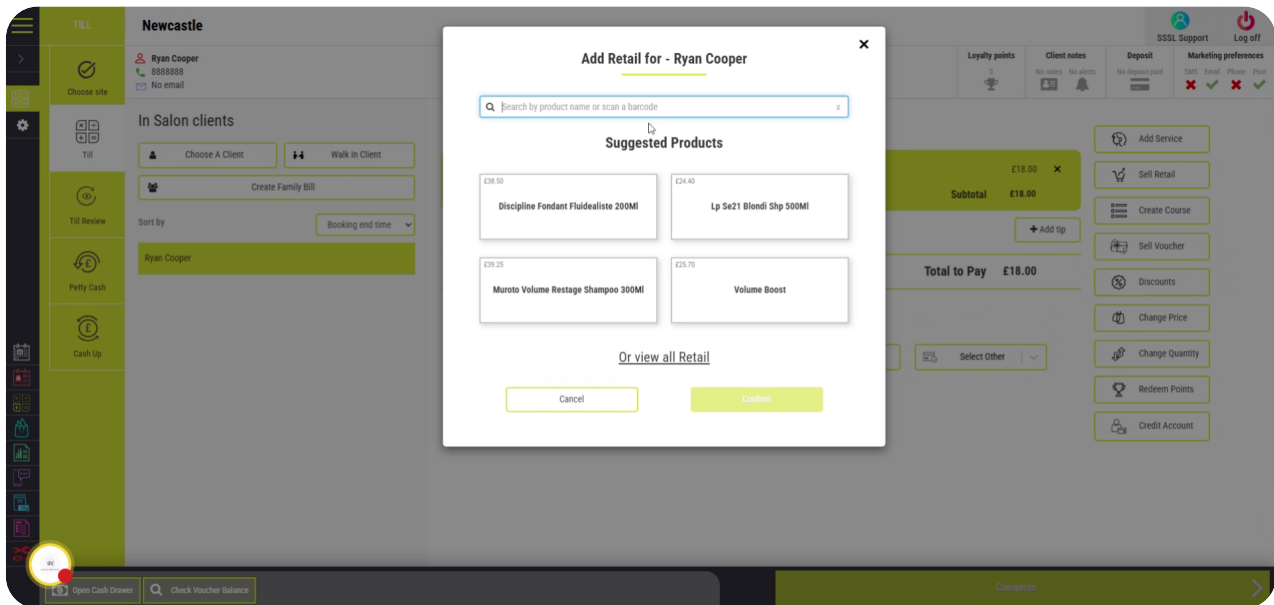

02 Select Bill And Team Member

Once we're in the till and we've found the bill we wish to add retail to in Salon Clients, we just need to select sell retail on the right hand side. We select the team member who's selling the retail.

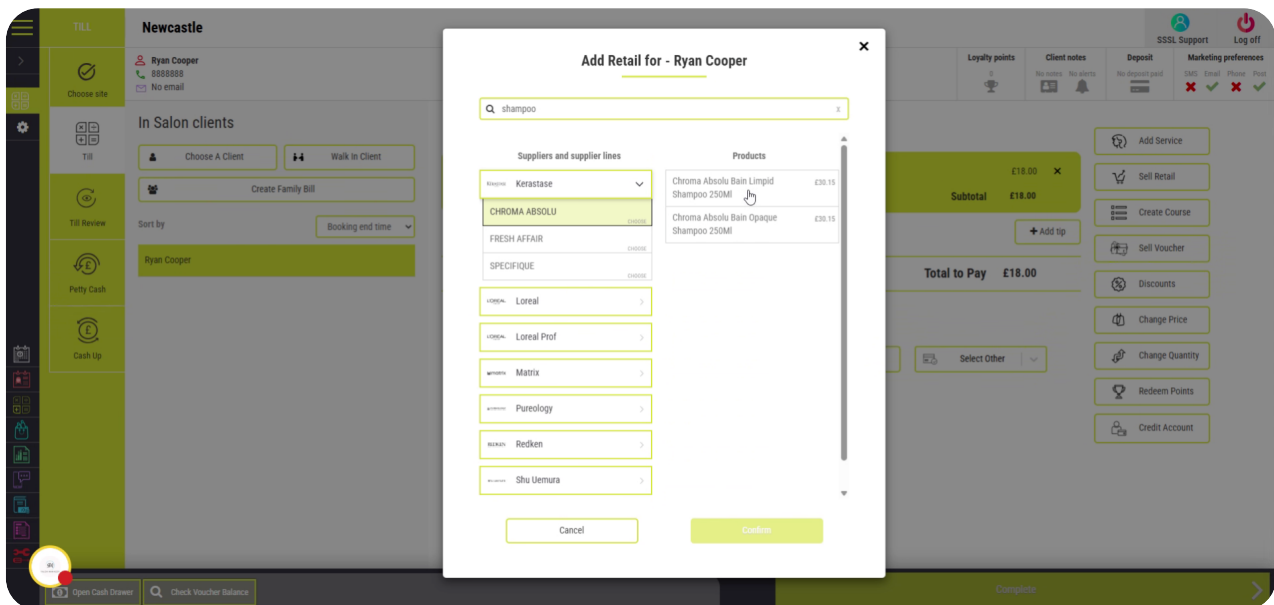

03 View Suggested Products List

A list of your suggested products, these will be your top products, will appear. We can search by product name or we can scan a barcode.

04 Confirm Product Addition

We can then find the relevant product, click confirm and add it to the bill.
