

Set Minimum and Maximum Stock Levels (Supplier Level)

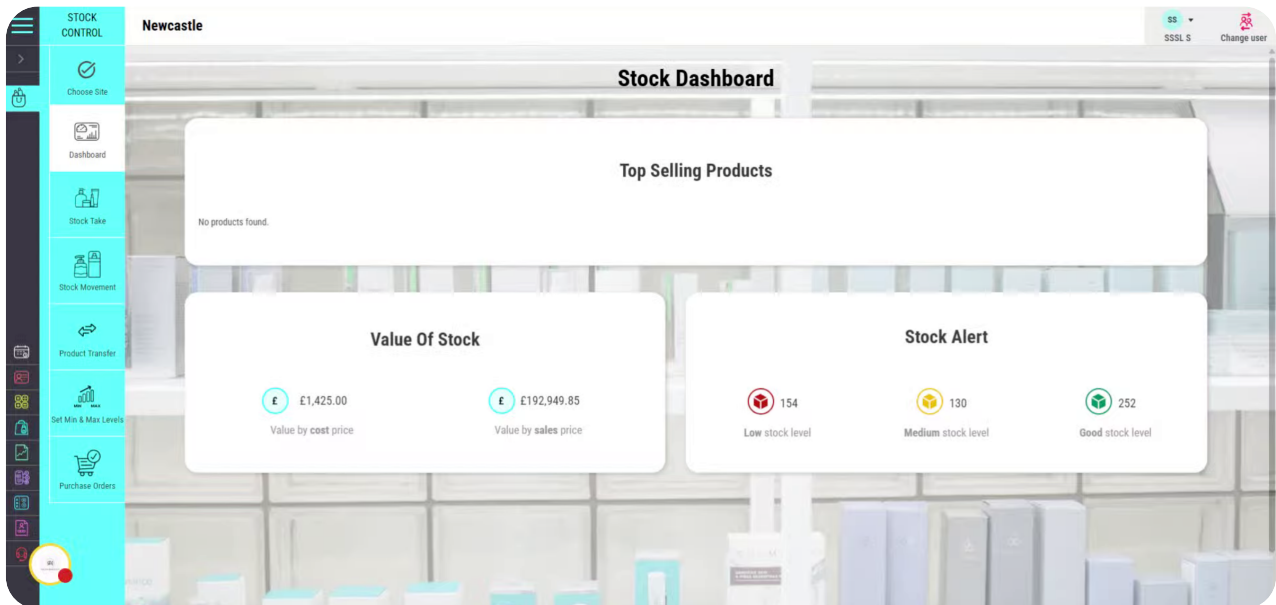

Powered by [guidde](#)

SALON MANAGER

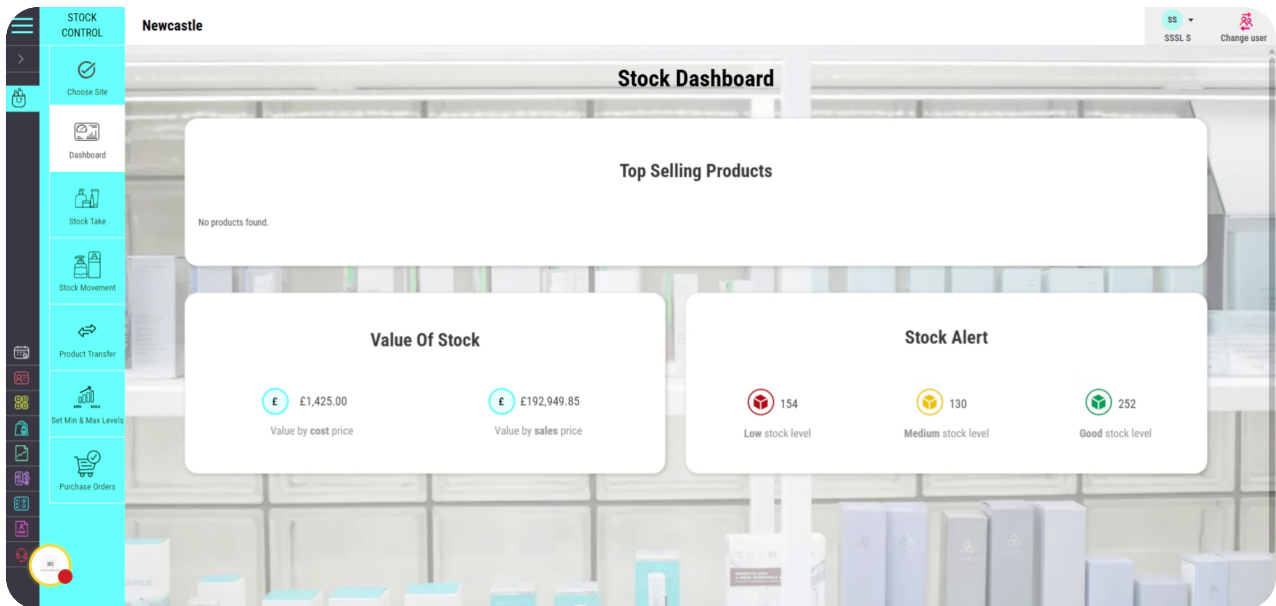

01 Introduce Stock Level Settings

Hello, today I'm going to show you how to set your minimum and maximum levels for an entire supplier range in the stock module in Salon Manager.

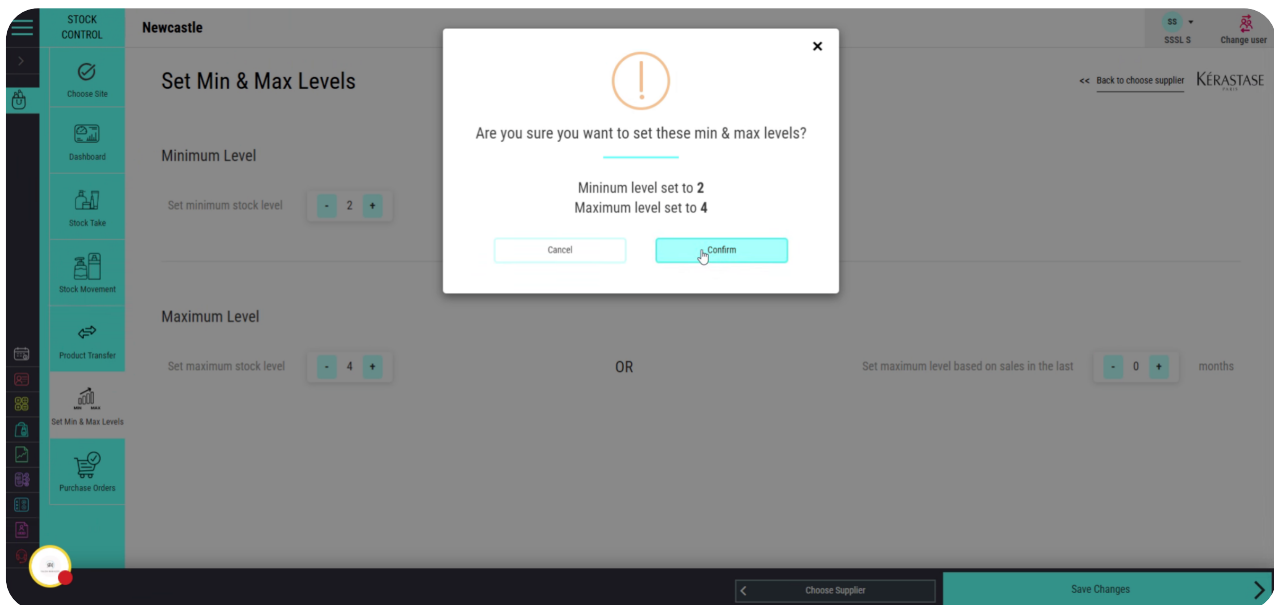

02 Set Supplier Min and Max Levels

From the stock module we just need to click set minimum and maximum levels on the left hand side menu. This will take us to a new page where we're able to select our supplier. Once we've selected our supplier we'll have the option to select the minimum level as well as the maximum level. We do also have the option to set the maximum level based on the sales in the last X amount of months. Once you're happy with the settings, just click save changes.

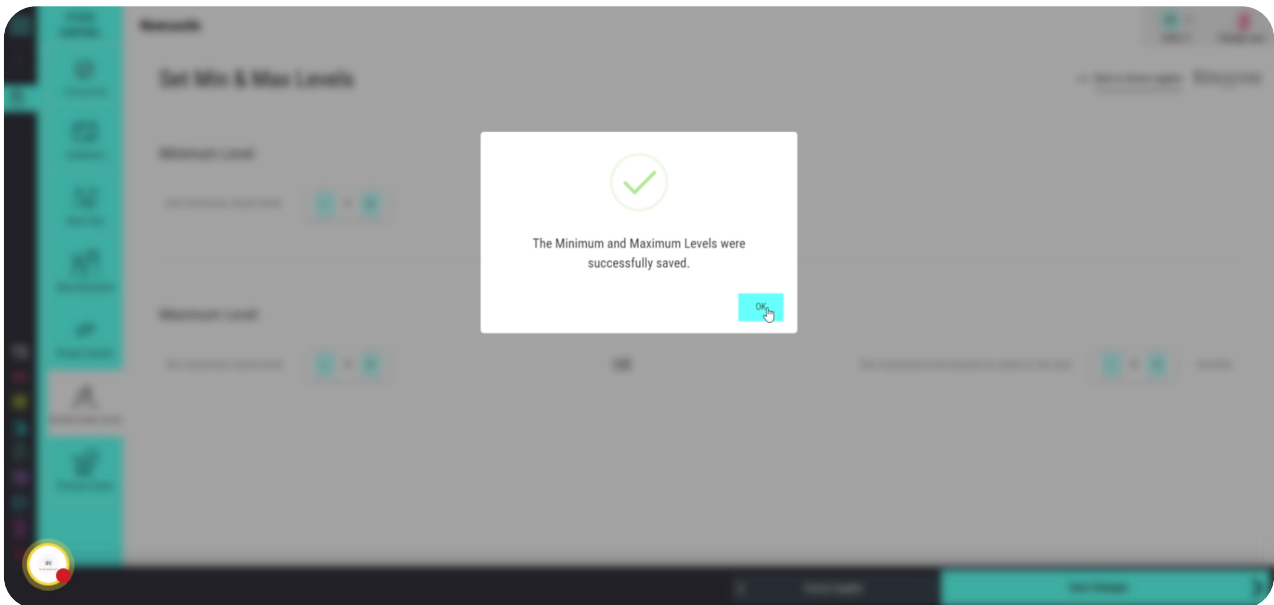

03 Confirm Level Settings

This confirmation screen will come up asking you if you wish to confirm this, you click confirm.

04 Acknowledge Save Confirmation

To confirm that you've saved your changes, you can click OK to exit.
