

Access And Navigate Salon Manager Reporting Module

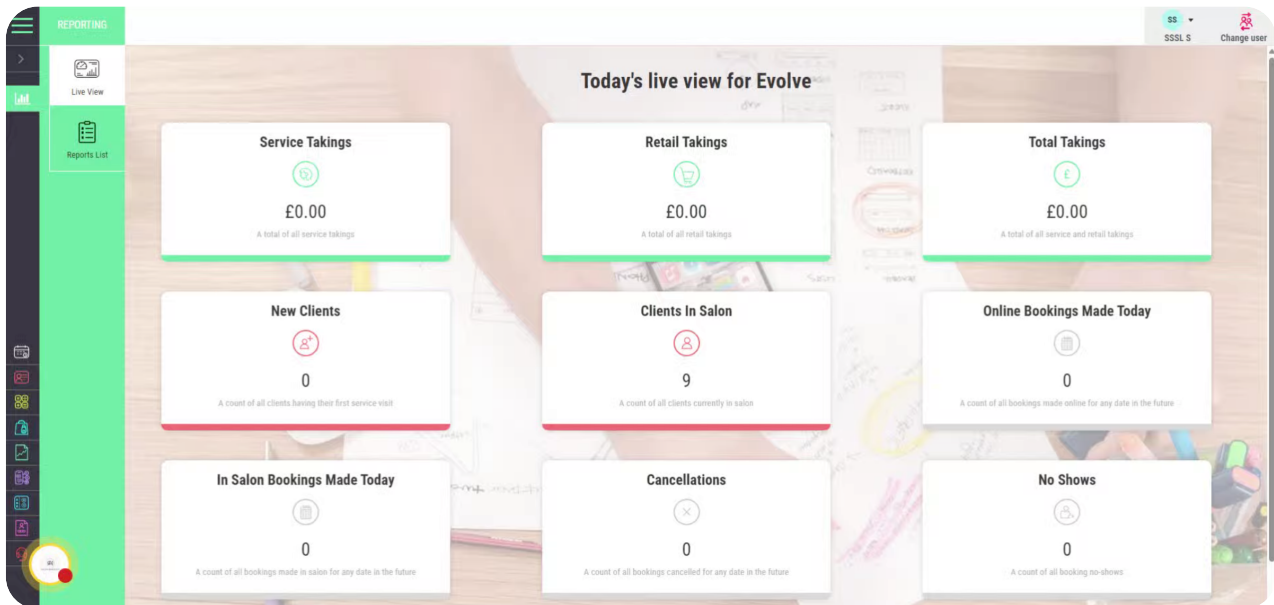

Powered by [guidde](#)

SALON MANAGER

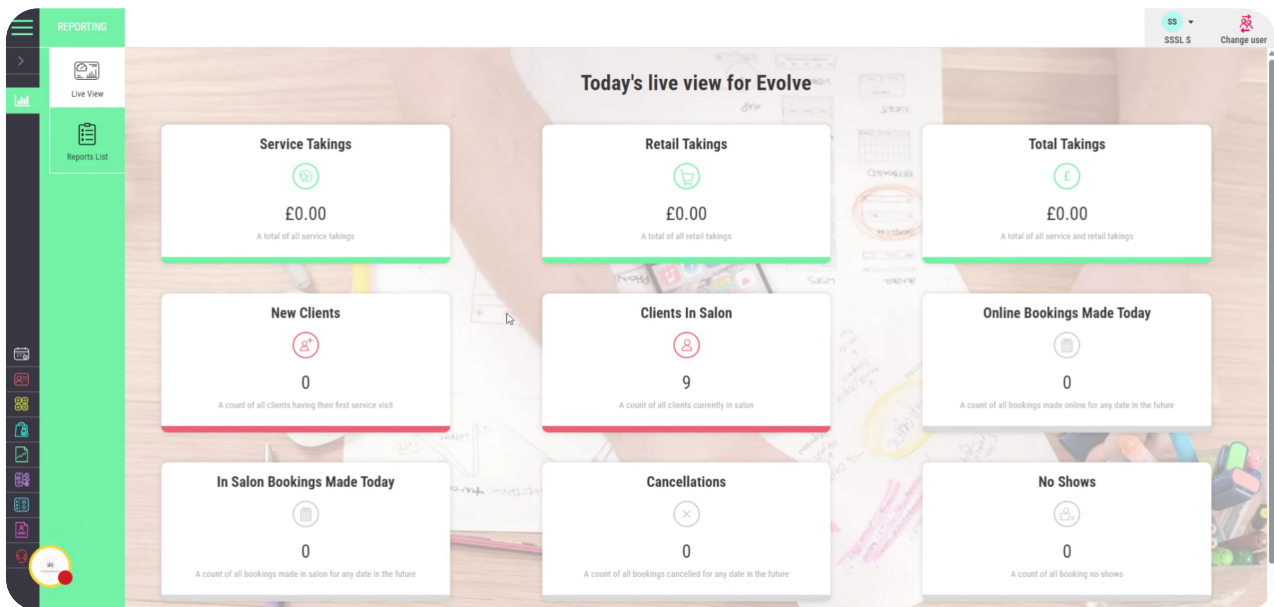

01 Overview Salon Manager Live View

From the reporting module, when you first click it, you will be loaded into the live view. This is an overview of today's data.

02 Navigate To Report List

To get to the report list, we just need to navigate to report list on the left-hand side.

03 Explore Report Categories

Clicking this will load us into a new page that will give us a list of all of our different reports. Each of these reports is categorised, so we have booking reports as the first report, clients as the second, and so on.
